MacDon

The Harvesting Specialists.

HARVESTING PERFORMANCE

For over 75 years MacDon has been a world leader in technology, innovation, and manufacturing of high-performance harvesting equipment. Our harvesting history is rooted deep in the rich prairie heritage of Winnipeg, Manitoba, Canada. MacDon products are distributed and supported worldwide from offices in Canada, the United States, Australia, Brazil, and Germany.

MacDon's relentless pursuit of improvement is driven by the desire to make harvesting easier and more productive for farmers. Working directly with producers and custom harvesters in the toughest real-world conditions guides MacDon to pioneer industry-leading innovations like the FlexDraper®. MacDon has a worldwide reputation for excellence as ***The Harvesting Specialists*** and we are proud to make equipment that help producers harvest the crops that feed the world.

GET MORE

Durability. Capacity. Speed. MacDon's 2 Series Combine Headers deliver all the latest performance and innovation that MacDon offers. The D2 Draper and FD2 FlexDraper® boast an all-new frame that features a super structured five-sided backtube. This solid backbone is ready to handle up to 20% increased capacity* from an ultra-deep 50-inch draper deck+. And that deeper draper gets filled up a lot quicker thanks to MacDon's ClearCut™ High-Speed Cutting System. Wrap it all up with MacDon's rock-solid reliability, and it's clear to see how MacDon 2 Series Combine Headers get you more from every acre.

**Compared to the previous model.*

CLEARCUT™ HIGH-SPEED CUTTING SYSTEM

MacDon's ClearCut™ High-Speed Cutting System delivers clean cutting at up to 30% faster speeds.* This high-speed system is delivered with two unique knife guards, more power from MacDon's improved knife drive and over 25% more cutting surface from an increased knife and guard geometry. Altogether, these improvements allow 2 Series Combine Headers to provide a smooth, clean, even cut every time.

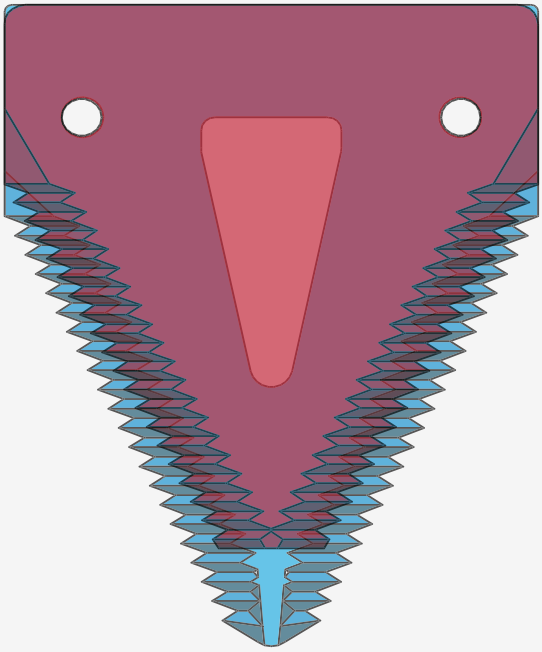

**Compared to the previous model.*

CLEARCUT™ HIGH-SPEED KNIFE DRIVE

MacDon's improved knife drive satisfies your need for speed, providing more torque to power through the most challenging cutting conditions. Featuring a larger output shaft, a flywheel for smooth operation, and a direct hydraulic drive, it's the heart of MacDon's ClearCut™ High-Speed Cutting System.

FD1 FD2

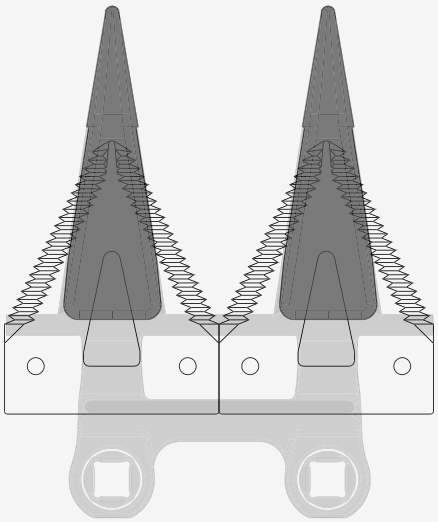

OVER 25% MORE CUTTING SURFACE

CLEARCUT™ KNIFE SECTIONS

MacDon ClearCut™ knife sections feature over 25% more cutting surface thanks to a longer blade and improved geometry. So what does that mean for you? It means faster, cleaner cut quality at higher ground speeds.

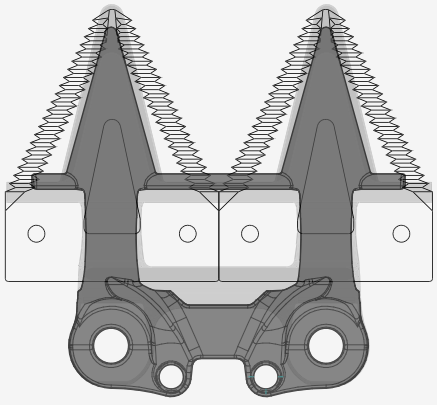

Stay Sharp!

Another great advantage of this new cutting system is the redesigned hardware. Fitted bolts make in-field knife section replacement quick and easy.

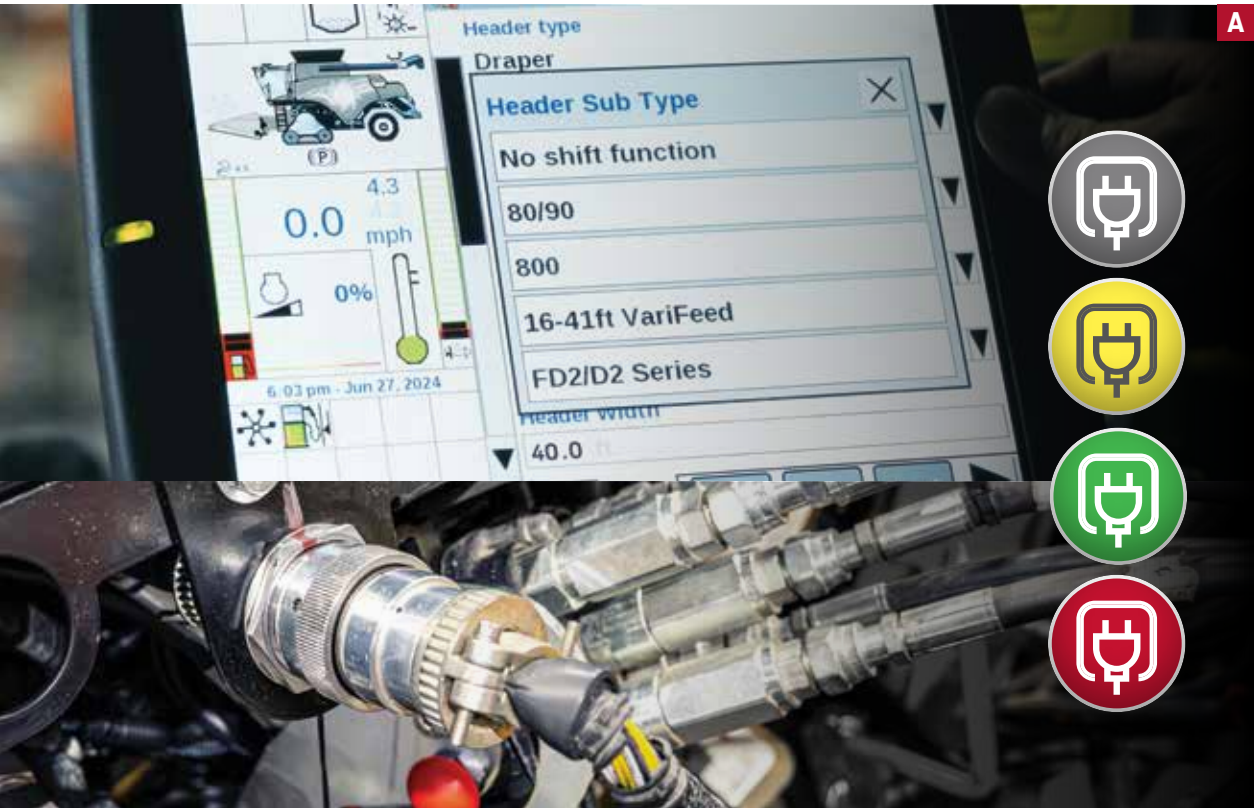

CLEARCUT™ POINTED KNIFE GUARDS

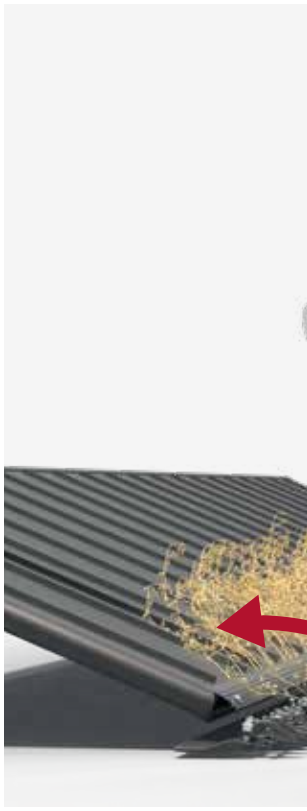

ClearCut™ Pointed Knife Guards are multi-purpose knife guards designed to glide along the surface at high cutting speeds for a clean, even cut every time.

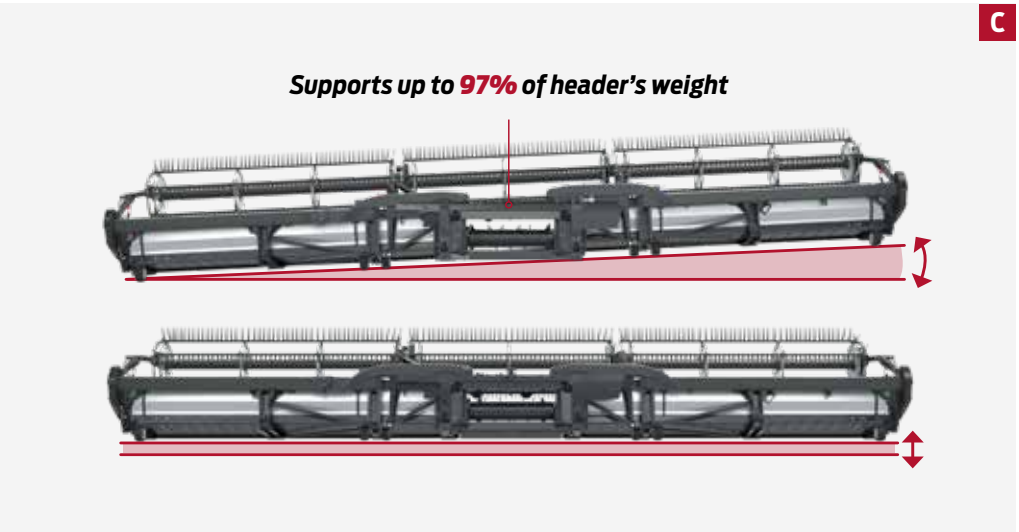

CLEARCUT™ PLUGFREE™ KNIFE GUARDS

This guard design gets the knife as close to the ground as possible while still protecting the blade from damaging debris in the field. ClearCut™ PlugFree™ Knife Guards resist plugging even in the nastiest conditions providing the closest, cleanest possible shave of the ground.

C
Supports up to 97% of header's weight

A COMBINE COMPATIBILITY & SEAMLESS INTEGRATION

The 2 Series fits all major brand combines with a completion package and integrates seamlessly with your combine's interface for the best possible user experience.* This multi-brand compatibility and interchangeability means your investment will hold its value when you decide to update.

**See your MacDon Dealer and find out if the 2 Series will fit your combine.*

B AMAZING REEL PERFORMANCE

The unique movement of the 2 Series reel picks up and gently places crop onto the drapers. Aluminum reel ends and sectors help reduce overall weight and improve efficiency. The 2 Series header and reel are highly adjustable right from the cab for optimal performance. Header tilt control adjusting the draper and knife angle, and fore-aft reel positioning lets you set up for the most challenging real-world harvesting conditions.

C ACTIVE FLOAT SYSTEM

The D2 and FD2 get instant float response with MacDon's Active Float System. Integrated but independent of the combine's auto header height control, this simple mechanical system supports up to 97% of the header's weight, allowing the 2 Series Combine Headers to float over ground fluctuations effortlessly. In addition, this instant float response lets the header cut close to the ground without pushing dirt, delivering a clean, close, even cut every time.

D SUPER-SIZED CAPACITY

With today's modern combines, it's all about more capacity, and with the 2 Series, you get up to 20%* more of it. This serious capacity boost comes from an ultra-deep deck featuring 50-inch deep drapers. These huge drapers perform with ease, cleanly laying down the biggest bushiest high-volume crops, keeping those big combines running smoothly with consistent heads-first feeding. This deeper draper also provides improved cutterbar visibility from the combine.

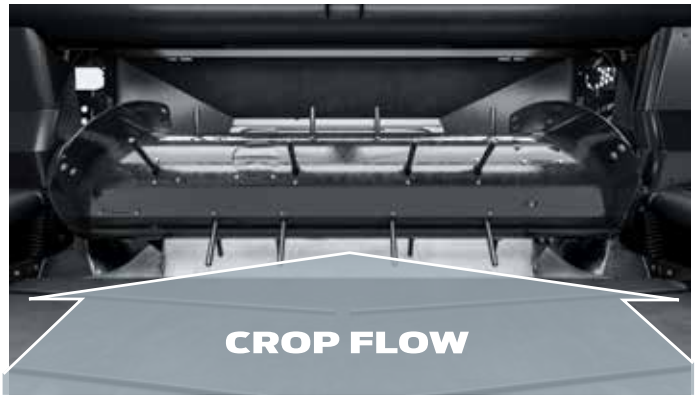

New for the FD2 is a 61 foot header size; paired with the deeper draper deck, the FD261 delivers the most crop capacity ever offered in a FlexDraper® model+.

+ 127 cm (50"), 18.5 m (61')
**Compared to the previous model.*

FEEDMAX™ CROP FEEDING SYSTEM

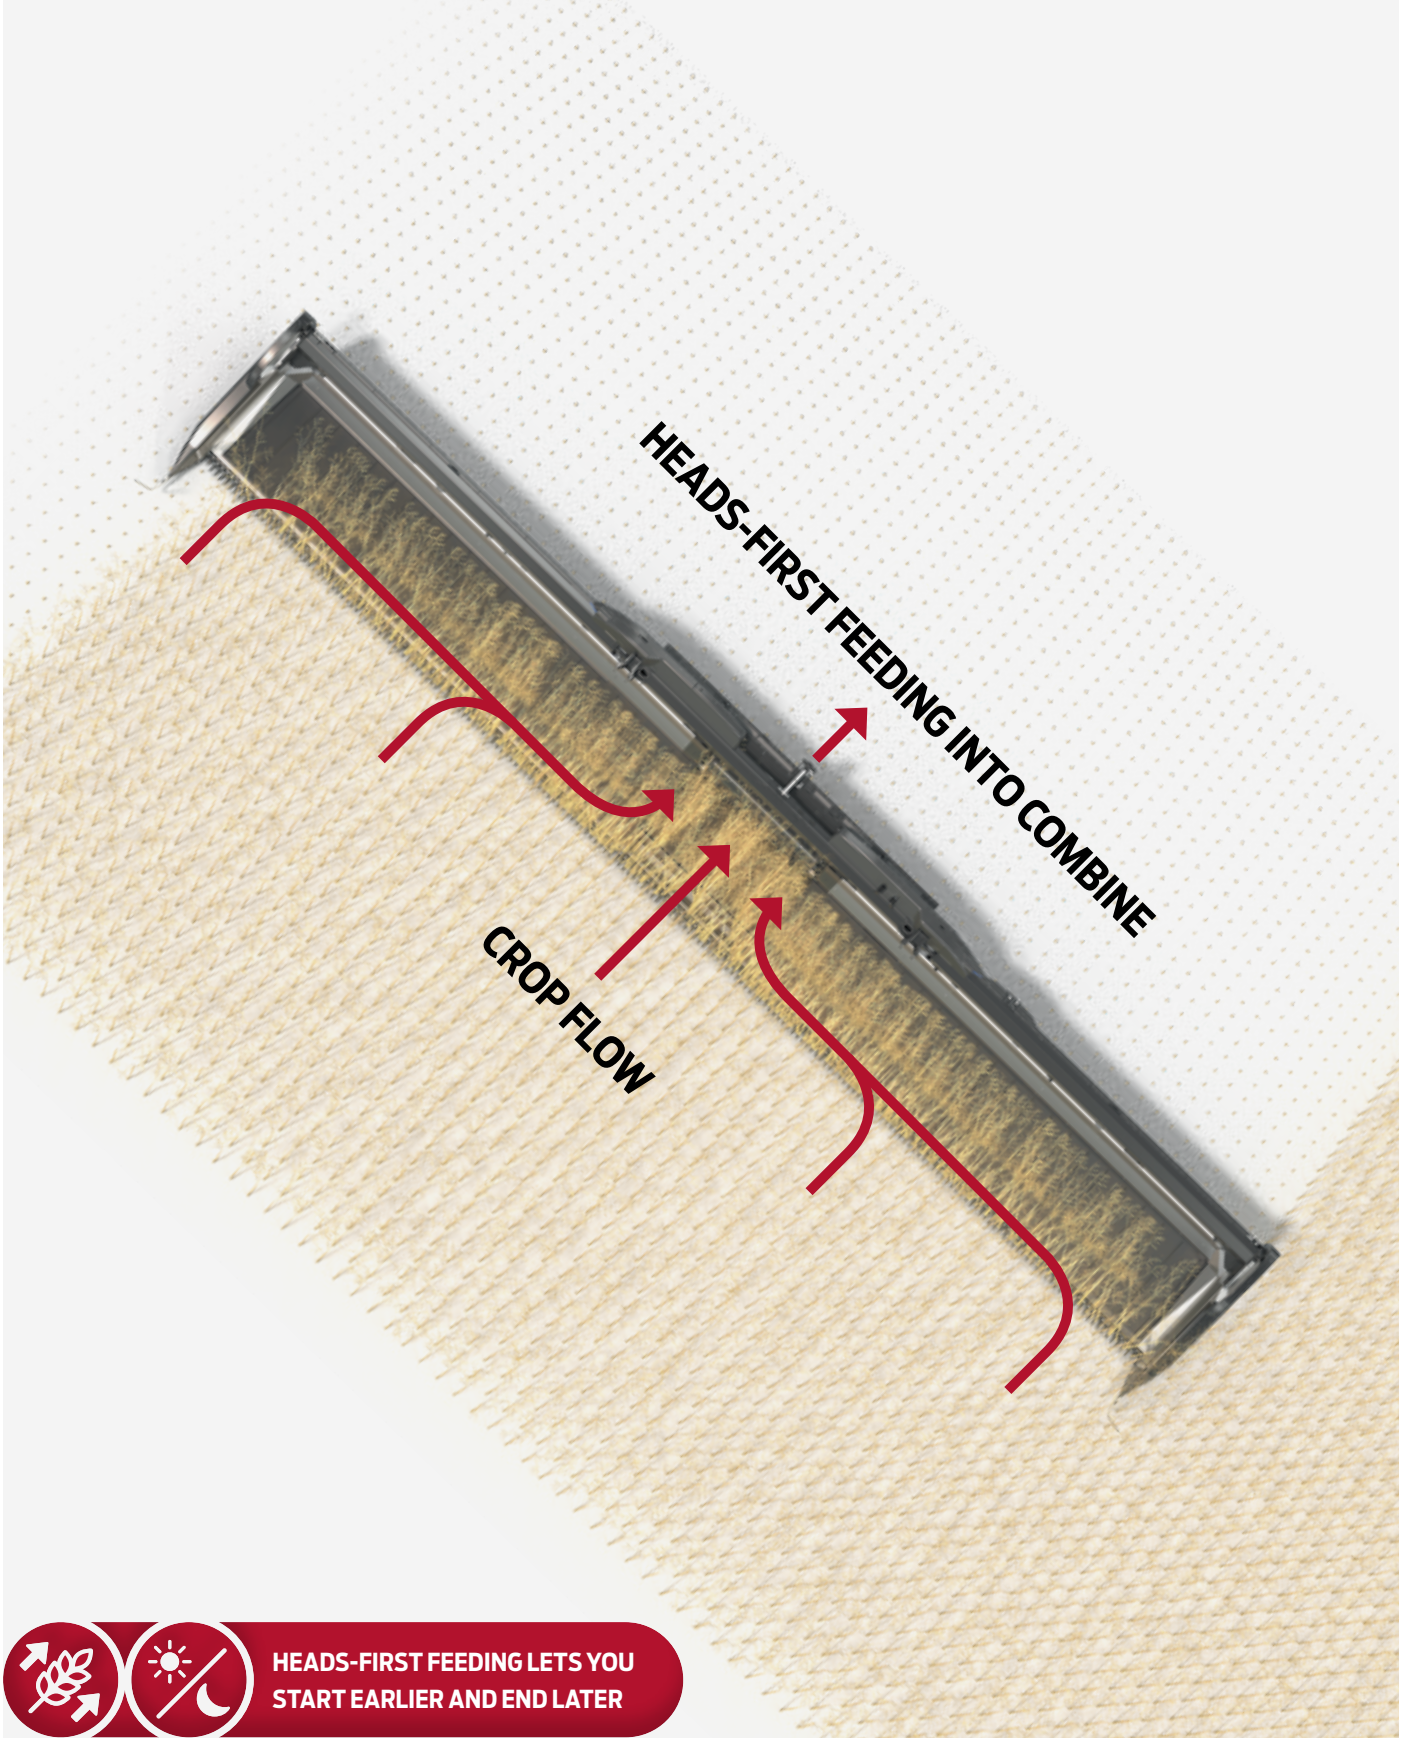

Big, small, new, old, the FeedMax™ Crop Feeding System has an aggressive feeding action and can be custom configured to match any combine's performance. Featuring combine-tailored speed control and customizable auger flighting to fit any combine's feeder house opening, the FeedMax™ Crop Feeding System upgrades and optimizes any combine's performance.

FeedMaX™

FULL-LENGTH UPPER CROSS AUGER

A performance option worth considering for anyone harvesting big bushy, high-volume crops, like canola, oilseed rape, peas, and mustard, is the Upper Cross Auger. The auger keeps bushy crops on the draper as they move to the center of the header, where twin pitch flighting actively and aggressively drives the crop down onto the feed auger. This option runs the entire length of the header and is available in all sizes.

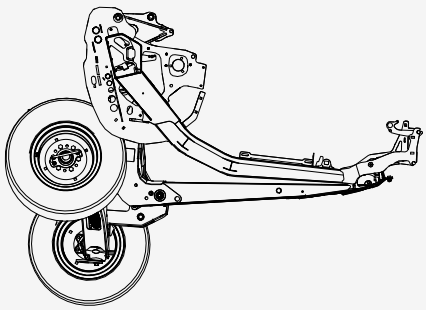

HEADS-FIRST FEEDING LETS YOU START EARLIER AND END LATER

HEADS-FIRST ACTIVE CROP FLOW

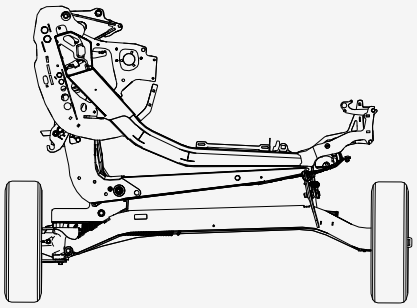

Once the crop gets on the drapers, MacDon's Active Crop Flow takes over, swiftly moving the crop heads-first down the side drapers and into the combine's feeder house. Now standard on the 2 Series, the in-cab side draper speed control allows on-the-go adjustment. Heads-first feeding promotes peak combine efficiency by improving threshing action, creating better straw distribution, and providing an overall more productive fuel-saving harvest. What's more, MacDon's Active Crop Flow is more efficient in damp and moist conditions, meaning you can start earlier and work later into the evening.

IN-FIELD

ON ROAD

A ALUMINUM COMPONENTS

From a glance, the most noticeable design cue on the 2 Series is the addition of aluminum components. Aluminum features include reel endshields, reel sectors, and backsheets. But these components aren't just for looking good; they help reduce the overall weight of the header, improving efficiency without compromising strength.

B EASY ADJUSTMENTS

You'll be ready to go as soon as the crop is with the 2 Series' easy adjustments.

Easy adjustments include:

- Easy to follow decals and adjustments to set the float (D2 & FD2) and flex (FD2 only)
- Easy access to the reel drive chain tensioner; just flip off the cover and use the Set-It-Right Multi-Tool to adjust.
- Now standard, in-cab on-the-go side draper speed control.
- Easily switch from flex to a rigid frame header with the flip of a lever (FD2 FlexDraper®).
- Quick Latch End Divider System allows you to hook and connect your divider in one move.

C EASYMOVE™ TRANSPORT*

MacDon's EasyMove™ Transport System makes it faster than ever to move your 2 Series Combine Header from field to field. This Performance Option is entirely self-contained on the header and allows transport at speeds up to 32 km/h (20 mph).** Machines equipped with this option can also use the transport wheels in-field to stabilize the header.

**Some products and/or options may not be available in all markets. See your MacDon Dealer for availability.*

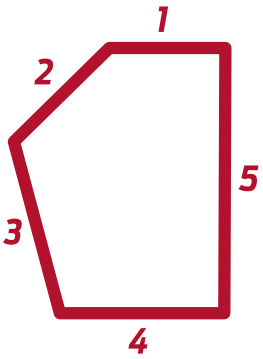

***Always follow local traffic laws and regulations.*

D CLEAN SWEEP CROP KEEPER SYSTEM

MacDon added a bunch of little extras onto each 2 Series Combine Header to keep the crop moving in the right direction, into the combine and onto your bottom line.

The Clean Sweep Crop Keeper System includes:

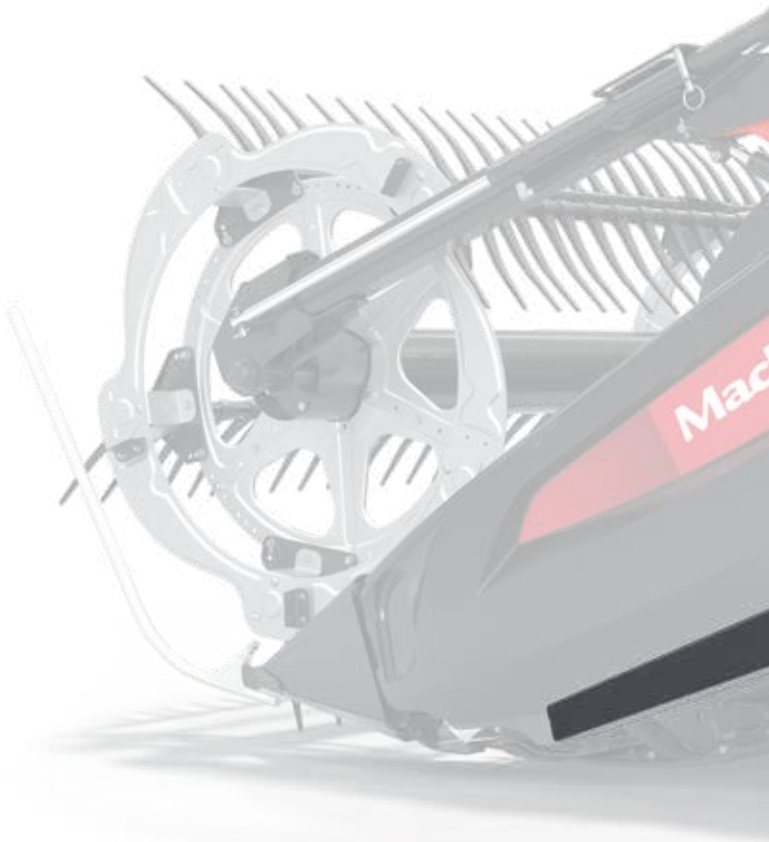

- Angled reel fingers and tines on the reel ends.
- Reel endshield crop paddles.
- Reel endshield crop deflectors.
- Inner endshield crop deflector fingers.

DURABILITY

MacDon has always ensured reliability by engineering rock-solid products, and the 2 Series carries that tradition forward. The 2 Series boasts a new frame featuring a super structured five-sided back tube. This solid backbone is ready to handle the up to 20% increased capacity* of the ultra-deep 50-inch+ draper deck.

**Compared to previous model.*
+ 127 cm (50")

A SHATTERGUARD REEL POSITIONING

Using MacDon's Set-It-Right Multi-Tool, this quick, simple adjustment to the reel comes standard on all 2 Series models. ShatterGuard Reel Positioning is designed for tall brittle bushy crops like canola and oilseed rape. This adjustment sets the reel further back on the header, preventing shatter on the ground and keeping the crop on the drapers where you want it.

B SET-IT-RIGHT MULTI-TOOL

Conveniently stored onboard the header, the Set-It-Right Multi-Tool is all you need to get the 2 Series dialed in for harvesting success.

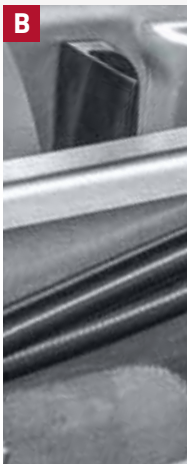

The Set-It-Right Multi-Tool lets you make the following adjustments:

- Set and adjust the header float (D2 & FD2) and flex (FD2 only)
- Set the ShatterGuard reel positioning
- Adjust the reel finger positioning and reel drive chain tension
- Add and remove end divider cones

C A CONSISTENTLY CLOSE SHAVE

MacDon's low-profile cutterbar improves on an already good thing; the knife's distance to the draper is shorter, meaning less chance of seed loss at the cutterbar. In addition, in-cab header tilt control adjusts the knife angle to match any harvest condition, and the ultra-smooth ground-facing surface of the cutterbar helps it glide along the ground for a smooth close shave every time.

IMPORTANT

FD2

BIGGER. FASTER. FLEXIER.

With the FD2, you get up to 70% more flex from the one and only FlexDraper®*. The FD2 is a floating three-section flexible header with single, double, and triple reel configurations allowing the entire header frame, cutterbar, and reel to flex up to 17 inches+ on either end. More Capacity. More Speed. More Flex. The all-new FD2 gives you more of everything you need for harvesting performance from the company that brought you the Original FlexDraper®.

**Compared to the previous model.*

FD2 SERIES WEBSITE

UPGRADE YOUR FD2
PERFORMANCE OPTIONS DOCUMENT

MORE FLEX

With the FD2, you get up to 70% more flex from the one and only FlexDraper®*. The FD2 is a floating three-section flexible header with single, double, and triple reel configurations. This allows the entire header frame, cutterbar, and reel to follow ground contours as a unit, flexing up to 17 inches+ on either end while maintaining a close reel-to-cutterbar relationship. This unique flexing action allows the FD2 to follow the ground and deliver smooth, consistent, heads-first feeding to the combine, even at extreme flex.

**Compared to previous model.*
+ 43.2 cm (17")

FD2 FLEX RANGE		
	Standard (Factory) Range	Increased Range*
FD225	102 mm [4"] up & 64 mm [2.5"] down	102 mm [4"] up & 102 mm [4"] down
FD230	165 mm [6.5"] up & 130 mm [5"] down	165 mm [6.5"] up & 165 mm [6.5"] down
FD235	205 mm [8"] up & 130 mm [5"] down	205 mm [8"] up & 205 mm [8"] down
FD240 Double Reel	205 mm [8"] up & 130 mm [5"] down	205 mm [8"] up & 205 mm [8"] down
FD241	205 mm [8"] up & 130 mm [5"] down	205 mm [8"] up & 205 mm [8"] down
FD240 Triple Reel	205 mm [8"] up & 205 mm [8"] down	
FD245	216 mm [8.5"] up & 216 mm [8.5"] down	
FD250	216 mm [8.5"] up & 216 mm [8.5"] down	
FD261	216 mm [8.5"] up & 216 mm [8.5"] down	

**The flex range can be increased by removing the flex limiter, however a greater reel to cutterbar clearance is required. This is a customer configuration; instructions in Op Manual*

TRIPLE REEL

New for the FD2 is a triple reel option. Three reel sections now mirror the flexing points of the header, delivering an even closer reel-to-cutterbar relationship for smooth, consistent, heads-first feeding. Triple reels are optional on 40 foot and standard on 45, 50, and 61 foot FD2 models+.

+ 12.2 m (40'), 13.7 m (45'), 15.2 m (50'), 18.5 m (61')

A MULTI-CROP HARVESTING SOLUTION

The MacDon FD2 FlexDraper® is a multi-crop harvesting machine. Switch the FD2 easily from flex to a rigid frame header with the simple flip of a lever, giving you the versatility to move from one crop type to another. Cereals, oilseeds, beans, just about any crop in any condition; another reason why the FD2 is the ultimate performance upgrade for your combine.

B CLOSE REEL-TO-CUTTERBAR RELATIONSHIP

The FD2 FlexDraper® features a fixed reel-to-cutterbar relationship. A small gap between the reel fingers and the cutterbar is maintained at all times, even at extreme flex, ensuring smooth, consistent, heads-first feeding of the crop over the entire length of the FlexDraper®.

C THE RIGHT SIZE FOR YOUR OPERATION

New for the FD2 is a 61 foot header size, making the FD261 the highest capacity FlexDraper® yet. Controlled traffic farms are covered with the 41 foot double reel and 61 foot triple reel FD2*.

Sizes Available:

7.6 m (25'), 9.1 m (30'), 10.7 m (35'), 12.2 m (40'), 12.5 m (41'), 13.7 m (45'), 15.2 m (50'), 18.5 m (61')

**Some products and/or options may not be available in all markets. See your MacDon Dealer for availability.*

D CONTOURMAX™ CONTOUR WHEELS

ContourMax™ Contour Wheels allow the header to follow the field's contours, leaving a consistent stubble height while cutting up to 18 inches off-the-ground. This incredible performance option uses the FD2's Flex-Float Technology® along with the combine's auto header height control to its full advantage, conveniently adjusting in-cab and on-the-go for 1 to 18 inches of off-the-ground, ground following harvesting performance.+

BRAND COMPATIBILITY

Switch combine brands with MacDon PW8 completion packages. These packages make it easy to switch between combine brands which increases resale value down the road.

**Some products and/or options may not be available in all markets. See your MacDon Dealer for availability.*

A SERIOUS PICK-UP CAPACITY IN ANY CROP CONDITION

A strengthened auger tube and robust chain drive allow the PW8 to easily handle high capacity loads. Both draper decks are run independently by hydraulic motors. The drapers are kept on track by MacDon's patented V-guide roller groove tracking system. Together, these systems allow the PW8 to process the heaviest swaths with ease.

ON-THE-GO CONTROL

The PW8 works with the combine's Automatic Header Height and Lateral Tilt System.

B SIMPLE ADJUSTMENTS

A simple draper tensioning system, easy to see draper tension indicators, and common all metric hardware allow adjustments to be made in a flash.

DROP-AND-GO FLOAT PERFORMANCE

Our simple and effective spring-over-shock floatation system provides a ground following 45.7 cm (18") of wheel float, and requires no adjustment during operation or lockout during transport. Float indicator numbers are clearly visible on both sides of the machine, letting you know the PW8 is operating at an optimal float position.

C GREAT SEED RETENTION

Tight draper connectors and seals, along with a deep overlap of front and rear draper decks ensure that more seed is making its way into the combine for better yields.

EASY MAINTENANCE

Five 100 hour grease points make for quick and easy maintenance of this machine.

Draper Header Service Kits

Available in both PlugFree™, and Pointed Guard Versions, Draper Header Service Kits from MacDon are a convenient "First Aid Kit" for your header. These kits contain a selection of high wear parts such as guards, sections, and hardware, and are ideal to have on hand at all times.

Refer to the MacDon Performance Parts - Parts Guide

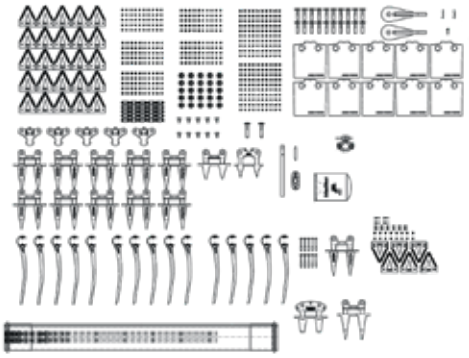

PART #	DESCRIPTION
311789	FD2/D2 POINTED GUARD SERVICE KIT
311790	FD2/D2 PLUGFREE™ GUARD SERVICE KIT

Service Kit Plus

An expanded kit of common wear parts and repair kits, ideal for customers operating multiple FD2/D2 headers, or those who want to maximize uptime. Available for single and double knife drive headers configured with Pointed Guards.

Refer to the MacDon Performance Parts - Parts Guide

PART #	DESCRIPTION
340492	POINTED GUARD, SINGLE KNIFE DRIVE
340493	POINTED GUARD, DOUBLE KNIFE DRIVE

Knife Assembly Kits

Provides all necessary knife segments and splice kits required to replace the complete knife on a header. Come packaged in 1 box for ease of transportation from dealership to field.

Refer to the MacDon Performance Parts - Parts Guide

Guard Kits

Convenient kits, containing all guards needed for a complete replacement. Come packaged on a small pallet for ease of transportation from dealership to field.
