200 G

Excavator

JOHN DEERE

WORK LIKE YOU MEAN IT

When you need reliable power, precise control, and intuitive functions to tackle tough tasks, the reimagined 200 G-tier can deliver uncompromised ability. Put its impressive dig forces and lift capacities to work stockpiling overburden, excavating basements, loading trucks, placing pipe, or whatever you need to do. Featuring customer-inspired standards including control pattern-change valve to ease operation and fuel-shutoff lever for conserving critical resources, plus options like hydraulic single-pedal propel system and deluxe LED lighting package, this economical, easy-to-transport excavator is designed with the optimization of your business in mind.

FEATURES

Step up your game
An affordable alternative to similar mid-size excavators in its class, the 200 G-tier is perfect for small contractors and rental companies.

Productive performance
Powerwise Plus™ hydraulic-management system balances engine performance and hydraulic flow for reliable operation. **Power** delivers smooth, balanced metering for normal operation. **Economy** reduces engine rpm and helps conserve fuel.

Know as you go
Multi-language LCD monitor and rotary dial provide intuitive access to a wealth of information and functions. Just turn and tap to select work mode, access operating info, check maintenance intervals, source diagnostic codes, adjust cab temperature, and tune the radio.

It's all about control
Ergonomically correct short-throw pilot joysticks enable smooth, precise fingertip control with less movement or effort. Push buttons in the right lever allow predictable control of auxiliary hydraulic flow for operating attachments.

In your comfort zone
Quiet and spacious cab features standard rearview camera for expansive all-round visibility. Sculpted mechanical-suspension high-back seat that slides together or independent of the joystick console helps keep operators comfortably supported.

FIND YOUR FIT

P — *EXCEPTIONAL PERFORMANCE*
Advanced features and performance

G — *RUGGED AND RELIABLE*
Proven capabilities and value

The choice is yours
Choose from a variety of track widths, arm lengths, buckets, high-flow auxiliary hydraulic packages, and other options to suit the application.

Dig in
When the digging gets tough, simply press the standard power-boost button on the right-hand control for more hydraulic muscle.

Ready to take it on
Large idlers, rollers, and strutted links enable the sealed and lubricated undercarriage to withstand and command. Track-frame undercovers help keep debris from accumulating. Three welded bulkheads within the boom resist torsional stress.

Let there be light
Standard LED work lights with optional deluxe LED lights at cab front and rear, boom, and toolbox shine when your workday extends beyond daylight. They use less power, output more light, and last longer than halogens, and are easy to replace when necessary.

It hardly seems like work
Large fuel tank and 500- and 5,000-hour engine and hydraulic oil-service intervals decrease downtime for routine maintenance. Fluid-level sight gauges are conveniently located and can be checked at a glance.

Precision Construction

This suite of construction technology delivers **Productivity Solutions** to help you get more done, more efficiently. In-base JDLink™ connectivity provides machine location, utilization data, and alerts to help you maximize productivity and efficiency. To maximize uptime and lower costs, JDLink also enables **John Deere Connected Support™.** Dealers use Expert Alerts based on data from thousands of connected machines to proactively address conditions that may otherwise likely lead to downtime. Your dealer can also monitor machine health and leverage remote diagnostics and programming capability to further diagnose problems and even update machine software without a time-consuming trip to the jobsite.*

Buckets — 200 G-TIER

A full line of buckets is offered to meet a wide variety of applications. Digging forces are with power boost. Buckets are equipped with John Deere TK-Series Bucket Teeth standard. A variety of teeth are available through John Deere Parts. Optional side cutters add 150 mm (6 in.) to bucket widths. Capacities are SAE heaped ratings.

Bucket Selection Guide*

*Contact your John Deere dealer for optimum bucket and attachment selections. These recommendations are for general conditions and average use. Does not include optional equipment such as thumbs or couplers. Larger buckets may be possible when using light materials, for flat and level operations, less compacted materials, and volume loading applications such as mass-excavation applications in ideal conditions. Smaller buckets are recommended for adverse conditions such as off-level applications, rocks, and uneven surfaces. Bucket capacity indicated is SAE heaped.
