AXIAL-FLOW®

COMBINE HEADERS SPECIFICATIONS

AXIAL-FLOW COMBINE HEADERS

Corn Head | Grain Head | Pickup Head | Draper Head

DESIGNED TO MATCH THE CAPACITY OF AXIAL-FLOW COMBINES

Case IH header options deliver consistent performance and durability, regardless of crop or conditions, allowing you to harvest more of what you grow. Just like the combines behind them, Case IH headers are simple to set and adjust, intuitive to operate and help deliver the highest-quality grain to the hopper. With heads as wide as 61 feet, they deliver a steady stream of grain to match the high capacity of machines like the Axial-Flow AF series.

THE GREATEST CHOICE OF HEADS TO GIVE YOU THE GREATEST YIELDS

CORN HEADS

Case IH Corn Heads are designed to pick cleaner, harvest faster, grab more down corn and save more grain. The corn heads incorporate the latest innovations in harvest technology, with features that maximize your time in the field and minimize your yield loss.

Case IH 6 to 18 row corn heads–available in narrow or folding configurations–provide increased corn harvesting speeds and consistent chop lengths to help increase productivity without sacrificing chop quality.

GRAIN HEADS

The Case IH rigid auger grain head is designed to match the high horsepower combines of today, offering faster harvesting speeds and the adaptability to tackle different crop conditions effectively. It can handle a range of challenging situations, including tangled and downed crops as well as uneven terrains.

PICKUP HEADS

The Case IH pick up head is ideal for small-grain harvesting like cereal, grass seed, and more. Our simple, proven design helps minimize seed loss, while extra picking fingers and adjustable belt speeds allow for increased performance in tough conditions.

DRAPER HEADS

FD2 Series FlexDraper By MacDon offer both rigid and flexible cutterbar configurations, variable draper speeds, a wide range of cutting widths, and a head-first feeding design for unmatched harvesting efficiency.

C500 SERIES CORN HEAD

The C500 series corn head is designed to pick corn cleaner and faster while delivering exceptional downed corn performance and grain savings.

A spring-free, self-adjusting deck plate linkage system, an industry first, offers up to 6mm of optimal variation and its rubber-based design eliminates common buildup issues found in spring-adjusted alternatives, significantly reducing maintenance time and costs.

Independent drive lines for row unit and chopper drives with dedicated slip clutch protection ensure optimal performance and reduce the risk of damage to the entire drive system. Header-mounted automatic slip clutch detection utilizes in-cab alerts through the Pro 1200 or Pro 700 display to identify problems before a major failure occur.

The C512 and C516 feature the industry's largest auger offering higher capacity to align with the newly released AF series and 260 series combines, ensuring maximized capacity and throughput.

ROWGUIDE PRO

Experience the enhanced power and precision of new RowGuide Pro,™ now optimized for the 260 & AF series combines. With significant improvements to the vehicle's hydraulics and steering systems, you'll enjoy a smoother, more responsive operation. RowGuide Pro removes manual corrections and interventions by combining GPS and advanced software for seamless row tracking, even in crop gaps like waterways. An enhanced steering system ensures smooth and efficient movement through the field. Elevate your harvesting performance with the latest advancements in agricultural technology.
